

Malibu/ Axis with Power Wedge & Single Exhaust Measurements Needed

Name : _____

Phone #: _____

1. Does your exhaust outlet look like the one in the drawing below?
If no, contact us.
2. Please lift the exhaust outlet flapper and measure the inside diameter of the opening (Orange Arrow). Give the approximate size: 3" 3-1/2" 4"
3. What is the gap between the wedge housing and the exhaust outlet (Blue Arrow)? Measure where the outlet contacts the boat. This needs to be very accurate so it may be easiest to push a piece of paper into the corners and measure between the fold marks on the paper.
4. What is the distance from the top of the exhaust outlet to the top of the Wedge Housing (Green Arrow)?
5. What is the gap between the top of the wedge housing and the bottom of the swim platform (Red Arrow)? If it is less than 5" then measure accurately; otherwise just say over 5".

You can enter the info below and email to mail@FreshAirExhaust.com or text image to 512.789.6266 or call with questions.

1. Yes No - Contact Us

2. Orange Arrow: 3" 3-1/2" 4"

3: Blue Arrow _____

4. Green Arrow _____

5. Red Arrow _____

. Engine Size: _____
